## What We Do

---

- CIVIL  
ENGINEERING
- PROGRAM  
MANAGEMENT
- MASTER  
PLANNING
- LAND  
SURVEYING

BSE prides itself on establishing true and long-lasting partnerships with our clients by providing them with the most comprehensive and efficient service possible.

## Who We Are

---

[Barron-Stark Engineers, LP \(BSE\)](#) was formed in 2009 for the specific purpose of providing quality and cost-effective engineering and surveying services to public and private clients within the DFW Metroplex and the State of Texas.

Since its inception, [Barron-Stark](#) has successfully completed projects throughout the state of Texas including Fort Worth, Dallas, Weatherford, Frisco, McKinney, Houston, Baytown, Corpus Christi, Amarillo, Midland, Andrews, Waco, Round Rock, and Athens. Scope of services provided include residential subdivisions, commercial site plans, TxDOT ramp modifications, flood plain reclamations/mitigation, and transportation improvements.

Our engineers and surveyors are a vital part of any project, from initial planning through schematic design to final project delivery. Our goal is to not only deliver a functional product addressing immediate needs, but to maximize both the present and future use of land and resources available.

# B Project Experience

## Greenridge Blvd & Commons Drive - Burleson, Texas

Greenridge Blvd. and Commons Dr. are major collector divided boulevards being constructed in connection with the Arabella development. BSE's scope includes alignment studies, paving & drainage design, water & sewer design, bridge design on Shannon Creek, ROW dedication instruments, TxDOT intersection improvements on FM 731 and SH 174, traffic signal design, themed hardscape for round-a-bout, bid documents, construction staking and construction administration.

## Permian Regional Medical Center – Andrews, Texas

Demolition of an existing hospital and construction of a new hospital, therapy center, and professional building on a single site. BSSCE provided the design of new public perimeter streets; resurfacing of existing public streets; new water, sewer, and fire suppression lines for the facility constructed in multiple phases; and new parking and emergency room entrances that were constructed in multiple phases.

## Cleburne-Crowley Rd & Longhorn Trail, Fort Worth Extra-Territorial Jurisdiction – Tarrant County, Texas

BSE is providing civil engineering and surveying services for two existing collector roadways, which are being upgraded to thoroughfares with curb and gutter sections with enclosed storm drainage. The project includes design and approvals in two jurisdictions (Tarrant County and Fort Worth), franchise utility relocations, box culvert upgrades. Maintaining access for bus traffic for a Crowley ISD facility throughout construction is a major design consideration.

## The Shops at Willow Park – Willow Park, Texas

Developed by Wilks Heritage Group, The Shops at Willow Park has become the signature retail development in the City of Willow Park. The project includes retail, restaurant, banking, office, and hotel components. BSE has provided entitlement, platting, site planning, and infrastructure design for the project.
